Course content

Why Attend

This workshop is designed for professionals seeking to improve their understanding of a business analyst's core roles and competencies, their practices, and the impact of these principles on organizational success. Through the workshop, participants will engage in hands-on exercises to derive, document, and analyze actions, learn how to evaluate solutions, and actively engage with stakeholders. Through a combination of theoretical knowledge and practical application, this workshop will equip attendees with the skills to identify business needs, model business processes, and contribute to the strategic goals of their organizations.

This interactive workshop introduces fundamental business analysis concepts through practical case studies. This dynamic approach allows participants to apply their knowledge to practical scenarios and gain a deep understanding of business analysis principles.

By the end of the course, participants will be able to:

- Explain the fundamental responsibilities of a business analyst and the importance of effectively prioritizing stakeholder needs
- Elicit requirements and model business processes to identify improvement opportunities
- Evaluate solution options and communicate findings effectively to stakeholders

This workshop is designed for aspiring business analysts who wish to enter the field of business analysis and for professionals who want to formalize their knowledge in this area.

- Analytical thinking
- Problem solving
- Structuring data
- Communicating analytical results
