Course content

Why Attend

Why Attend Creative thinking and innovation are essential for solving problems, improving performance, and staying competitive in a changing business environment. Organizations need employees who can generate fresh ideas, challenge traditional approaches, and turn opportunities into practical solutions. This course provides participants with practical tools and techniques to strengthen creativity, encourage innovation, and drive continuous improvement.

Course Methodology This course uses an interactive and practical approach through presentations, case studies, brainstorming sessions, group discussions, innovation exercises, problem-solving activities, and real workplace examples.

Course Objectives

- Understand the principles of creativity and innovation
- Apply creative thinking techniques to solve problems
- Generate and evaluate new ideas effectively
- Overcome barriers to creativity
- Improve decision-making through innovative thinking
- Build a culture of innovation in the workplace
- Use structured tools for idea development
- Create practical innovation action plans
